

SE Boot Camp Assignment 9

Create a JavaScript file (link it to an HTML file), and write code for below 3 tasks:

- A. Print below friends' information of John to the console by accessing the object's properties.

? has # friends, and his best friends is called ?

- B. Finish writing `getSummary` function;
Print the result of `getSummary` to the console by calling this method(function).

```
const john = {  
  
  firstName: 'John',  
  lastName: 'Williams',  
  birthYear: 1996,  
  job: 'student',  
  friends: ['Mike', 'Jack', 'Peter'],  
  calAge: function () {  
    this.age = 2021 - this.birthYear;  
    return this.age  
  },  
  //Unfinished  
  getSummary: function () {  
    return `? is a # years old, and he has a/no driver's license`  
  }  
}
```

- C. Create an HTML page that displays 3 buttons and one modal window block (hidden).
Clicking on any of the three buttons will open the same modal window.
Apply JavaScript only to open/close the modal window.
